

CIRCULAR

TYPE & NUMBER ELEXON Circular - EL02798

Date 11 April 2018
To BSC Parties
From BSC Operations
Purpose For Information

BSC Systems unable to process declarations of Demand Capacity or Generation Capacity

What is happening?

Further to Circular [EL02791](#), ELEXON is still experiencing issues processing re-declarations of Demand Capacity (DC) and Generation (GC) values for Supplier BM Units. Until this issue is resolved, we ask that Parties do not submit BSCP15/4.4 (Mid-Season Changes of Positive and Negative BM Unit Metered Volume Estimates) forms as these cannot be actioned.

How will I be impacted?

Any submissions between **29 March 2018 and 11 April 2018** have been logged and will be actioned once the system issues have been resolved. Where the effective from date has passed for these submissions, BSC Parties will be contacted directly.

Is there anything else I need to know?

If this issue is adversely affecting your Credit Cover calculations, a case for '[Material Doubt](#)' can be submitted as per Section M of the Balancing and Settlement Code. We are still working to resolve the issue and another Circular will be published in due course.

For more information, please contact bscservicedesk@cgi.com.
